

SRTS Center City Schools Neighborhood Safety & Climate Resilience Project

Project Snapshot

Project Limits: The 21-school project area in the City's core is bounded by Oxford Avenue (west), Beverly Boulevard (north), Lafayette Park Place (east), and 4th and 7th Streets (south).

Project Scope: The project improvements include the installation of over 30,000 linear feet of new and upgraded bike facilities (Class II, III and IV), 5 roundabouts, 3 center medians, 4 traffic circles, 40 curb extensions, 20 speed tables or humps, 3 HAWK signals, 1 RRFB signal, 30 curb ramps, new sidewalks, and 164 shade trees.

Description: This project, a 1.5 mile square in the City's densely residential and commercial core, will create over 5 miles of continuous, green, stress-free travel connectivity to 1) improve the comfort and safety of over 6,000 students who walk or bicycle to/from school, 2) manifest a neighborhood friendly network as an alternative to arterials to increase safety and comfort for users of all ages and abilities, 3) facilitate safer pedestrian/ bicyclist crossings over busy and high-speed arterials, and 4) improve local pedestrian/bicycle access to the school and everyday destinations. Traffic calming treatments will address high speeds and turns of local and cut-through traffic , and dangerous driver behavior and non-compliance to traffic controls which currently jeopardize the safety, comfort, and convenience of using active transportation to access local and cross-city destinations, and be physically active for health and leisure.

Council District: 1st, 10th, 13th

Project Status: In Design
